

RIVERSIDE CHILDREN'S HOSPITAL

Discharge Summary

Patient: Maya Chen

Age: 9 years

Date of Discharge: June 12, 2026

DIAGNOSIS:

Acute asthma exacerbation, resolved with treatment.

MEDICATIONS AT DISCHARGE:

1. Albuterol inhaler - 2 puffs every 4-6 hours as needed for wheezing or shortness of breath
2. Prednisolone 20mg - once daily for 5 days (last dose June 17)
3. Fluticasone inhaler - 1 puff twice daily, continue ongoing as maintenance

FOLLOW-UP APPOINTMENTS:

- Pediatrician visit in 1 week (by June 19) to reassess breathing
- Pulmonology referral if symptoms return or worsen

ACTIVITY:

Light activity okay. Avoid strenuous exercise for 3-4 days.

WARNING SIGNS - GO TO THE EMERGENCY ROOM IF:

- Difficulty breathing or rapid breathing
- Lips or face turning blue or gray
- Unable to speak in full sentences due to breathlessness
- Albuterol not helping within 15-20 minutes
