

SUNNYBROOK MATERNITY CENTER

Newborn Discharge Summary

Patient: Baby Girl Martinez

Age: 2 days

Mother: Sofia Martinez

Date of Discharge: June 14, 2026

DIAGNOSIS:

Healthy newborn, routine discharge following uncomplicated vaginal delivery.

MEDICATIONS AT DISCHARGE:

1. Vitamin D drops - 400 IU once daily (continue until at least 12 months of age)

FOLLOW-UP APPOINTMENTS:

- Pediatrician visit within 3-5 days (by June 19) for weight check and newborn screening results
- Mother's postpartum OB follow-up in 6 weeks

FEEDING:

Breastfeeding every 2-3 hours (8-12 times per day). Watch for at least 6 wet diapers per day by day 5.

WARNING SIGNS - CALL THE PEDIATRICIAN IMMEDIATELY IF:

- Yellowing of skin or eyes (jaundice) that worsens or spreads
- Fever (temperature 100.4F / 38C or higher)
- Poor feeding or excessive sleepiness
- Fewer than 6 wet diapers per day after day 5
- Difficulty breathing or bluish color around lips
